

Magnetic Drain Plug Mod

By: Kiwi_ER-6F (www.ninja650.com)

Next time you carry out an oil change consider replacing the OEM oil drain plug with a magnetic drain plug from C.G Enterprises (<http://www.magneticdrainplugs.com/> or <http://www.cgenterprises.com/>). The recommended magnetic drain plug for the 650 cu in engine used on the Ninja 650R (ER-6F), ER-6N and Versys is a P/N 1044M, this is a 12 mm x 1.5 thread with a 17 mm head.

They also carry the aluminium drain plug gaskets (P/N 2414) which I recommend replacing at every oil change.

At US\$4.50 for the magnetic drain plug and 39 cents for the gasket these really are cheap insurance.
